

Research Collaborations

Questions to Consider and Discuss with Your Research Partner

- ❖ What could we do? What are all the possible opportunities before us?
- ❖ What are our goals for doing research together?
- ❖ How would our partnership help us each to better achieve our own goals and objectives?
- ❖ Do we have enough time and energy to devote to a new research project and partnership?
- ❖ What are the benefits and drawbacks of doing research together?
- ❖ How will the research efforts be divided-up between us?
- ❖ What will each of us gain through this partnership?
- ❖ What are some good strategies for working together?
- ❖ What do we need to know about each other before engaging in a research partnership?
- ❖ Are there issues we need to discuss before starting a research partnership? What will our strategy be for dealing with conflict?
- ❖ Are the roles, responsibilities, and expectations within our partnership defined and understood by everyone?
- ❖ What will be the decision-making process throughout our partnership?
