

# Xiao Fan

Office phone number: (352) 273 9938

Email: [xiaofan@ufl.edu](mailto:xiaofan@ufl.edu)

Website: <https://xiaofan-lab.github.io/>

## Education

- 2011.9 – 2016.6, University of Alberta (in the lab of Dr. Lukasz Kurgan)  
Ph.D. in Electrical and Computer Engineering, GPA: 4.0/4.0
- 2009.9 – 2011.7, Harbin Institute of Technology (in the lab of Dr. Ye Zhang)  
M.Sc. in Information Engineering, GPA: 89/100
- 2005.9 – 2009.7, Ocean University of China  
B.Sc. in Electronic Information Science and Technology, GPA: 86/100

## Work experience

- 2023.1. – present University of Florida  
Assistant Professor in the J. Crayton Pruitt Family Department of Biomedical Engineering
- 2021.8 – 2022.12 Columbia University (in the labs of Drs. Wendy Chung and Yufeng Shen)  
Associate research scientist in the Department of Pediatrics
- 2018.7 – 2021.7 Columbia University (in the labs of Drs. Wendy Chung and Yufeng Shen)  
Postdoctoral research scientist in the Department of Pediatrics
- 2016.8 – 2018.6, Mayo Clinic (in the lab of Dr. Iftikhar Kullo)  
Postdoctoral fellow in the Department of Cardiovascular Diseases

## Research experience

1. Genetic association
  - Study genetic causes of common conditions using genome-wide association study and phenome-wide association study.
  - Discover novel genes/loci for rare inherited diseases especially for cardiovascular diseases and cancer using next generation sequencing data.
2. Variant pathogenicity
  - Specialized in variant classification based on American College of Medical Genetics guideline.
  - Improve variant interpretation by leveraging phenotypic and expression data.
3. RNA sequencing
  - discovery of novel microRNA from short RNA sequencing data and expression differential analysis.
  - Identification of bacteria using 16s rRNA sequencing data and expression differential analysis.
4. Machine learning
  - Prediction of variant pathogenicity
  - Prediction of intrinsically disordered protein
  - Protein crystallization prediction
  - MicroRNA target prediction
  - Disease diagnosis using electronic medical record (EMR)

## Skills

- Machine learning: feature transformation and selection, clustering, regression, classification.
- Deep learning: PyTorch, keras, sklearn.

- Next-generation sequencing analysis: DNA-seq, RNA-seq, microRNA sequencing and 16s rRNA sequencing.
- Bioinformatics database: NCBI, EMBL, UCSC, GTEx, GEO, Uniprot, ClinVar, gnomAD, etc.
- Bioinformatics tools: GATK, BLAST, VEP, ANNOVAR, samtools, PLINK, KING, etc.
- Programming languages: C++, R, Bash and Python.

### Awards & Grants

- Principal investigator for NIH Pathway to Independence Award (K99/R00 Independent), 2021-2026
- Co-investigator for the American Heart Association Institute for Precision Cardiovascular Medicine Data Ming Grants, 2017
- Andrew Stewart Memorial Graduate Prize (up to 20 doctoral students annually), 2015
- Alberta Innovates Graduate Student Scholarship, 2014-2015
- Distinguished Graduate Dissertation Award, 2011
- Distinguished Undergraduate Dissertation Award, 2009
- Excellent Completion in Innovative Experimental Program, 2007-2009

### Mentoring

- Two medical students (minorities) under summer research fellowship provided by the Mayo Clinic DEI program
- One high-school student through RISE High (Rochester) provided by the Mayo Clinic DEI program
- Two international medical graduates (India) through trainee program at Mayo Clinic
- One medical student under summer research fellowship provided by Columbia University
- One international colleague student (China) virtually visiting Columbia University
