"Responsible Data Science and AI for Advancing Intelligent and Equitable Health"

Qi Long, PhD
Director, Center for Cancer Data Science
Associate Director, Penn Institute for Biomedical Informatics
Director, Biostatistics and Bioinformatics Core, Abramson Cancer Center
University of Pennsylvania

LEARNING OBJECTIVES:
Upon completion of this activity, participants should be able to:

1. Upon completion of this activity, participants should be able to recognize and identify factors that may contribute to biased results from analysis of complex electronic health records data.
2. Upon completion of this activity, participants should be able to recognize that statistical and machine learning methods and algorithms that do not adequately account for biased data in electronic health records can yield biased findings and exacerbate inequities in medicine.
3. Upon completion of this activity, participants should be able to gain the general knowledge on advanced data science methods for analysis of complex electronic health records data.

Speaker Disclosure:
Dr. Long has disclosed that he has no relevant financial relationships. No one else in a position to control content has any financial relationships to disclose. Conflict of interest information for the CME Advisory Committee members can be found on the following website: https://cme.ufl.edu/disclosure/. All relevant financial relationships have been mitigated.

Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
